

Adroit Smart UI Asset Library — Help

Version 1.0.0 | Support: support@adroit.co.za

What is this?

The Adroit Smart UI Asset Library is a browser-based catalog of pre-built UI graphics, wizards, templates, object templates and related assets for Adroit Smart UI applications. You can browse, search, filter, preview, download individual assets, or collect several assets in a cart and download them as one ZIP file.

Getting started

1. Open the Asset Library in your web browser.
2. Wait for the loading screen to finish — assets are fetched from the server or server cache.
3. Use the Categories sidebar and search bar to find what you need.
4. Download assets individually or add them to your cart for a bulk download.

If the library is embedded inside another application,

i.e. Adroit Smart UI Designer in Asset Library tab, the header is more compact, and some options (theme, full Help menu) may be hidden. Append ?embedded=1 to the URL for embedded layout.

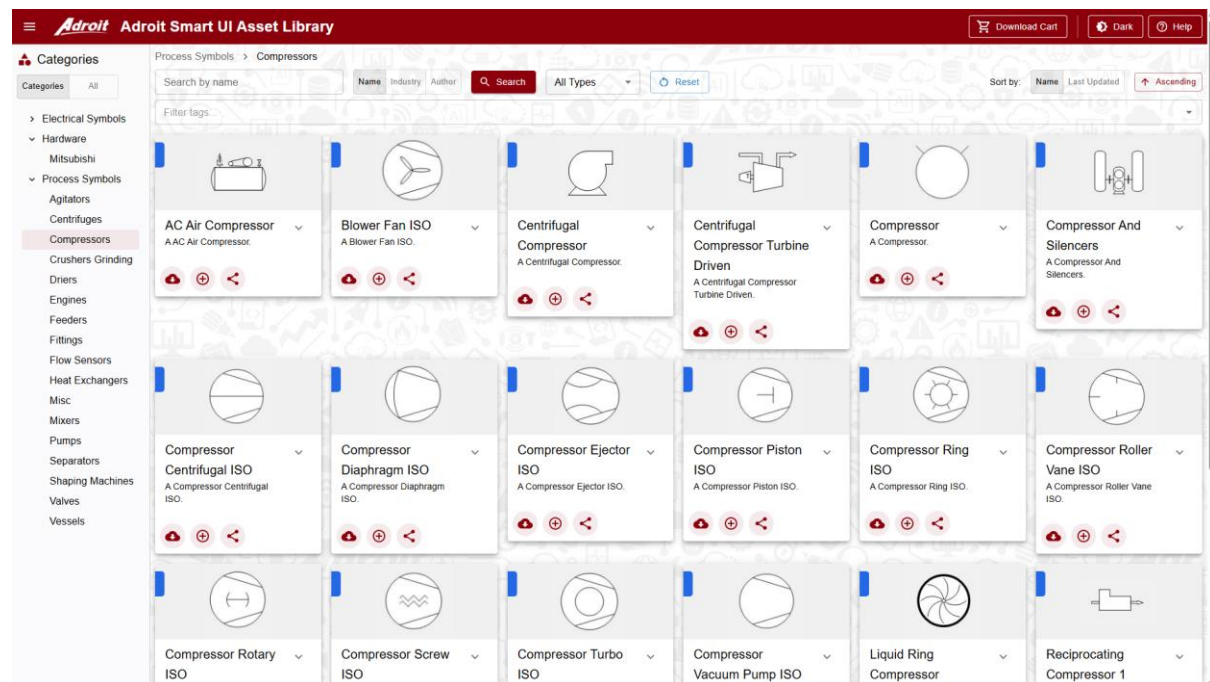

Figure 1: Adroit Smart UI Asset Library

Screen layout

Area	Purpose
Header (red bar)	App title, cart controls, theme toggle, Help menu
Left sidebar	Category tree and Categories / All toggle
Main area	Breadcrumbs, search/filters, tag bar, asset cards
Footer	Copyright notice

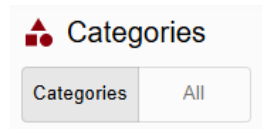

Show/hide sidebar: Click the menu (≡) button in the header.

Resize sidebar: Drag the thin strip on the right edge of the sidebar (200–400 px wide).

Browsing by category

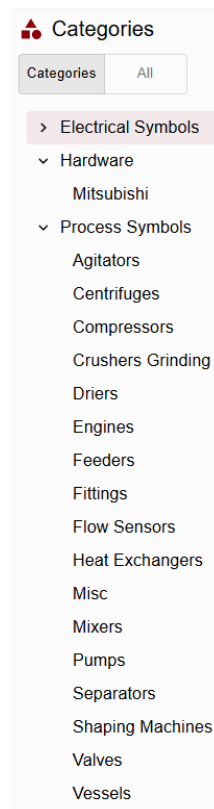

Categories vs All

- Categories — Browse one category at a time using the tree.
- All — Show assets from every category together (no tree).

Category tree

Categories can be nested (e.g. Parent/Child). Click a node to filter the main grid to that category. Breadcrumbs at the top of the main area show your current location; click a breadcrumb segment to jump back up the tree (when not in All mode).

Finding assets

Search

1. Choose what to search by: Name, Industry, or Author.
2. Type your search text.
3. Click Search or press Enter.

Search is not live — you must click Search or press Enter after typing.

Industry search tip: When Industry is selected, use the ▼ button in the search box to pick from a predefined list (Agriculture, Manufacturing, Oil & Gas, Water & Wastewater, etc.).

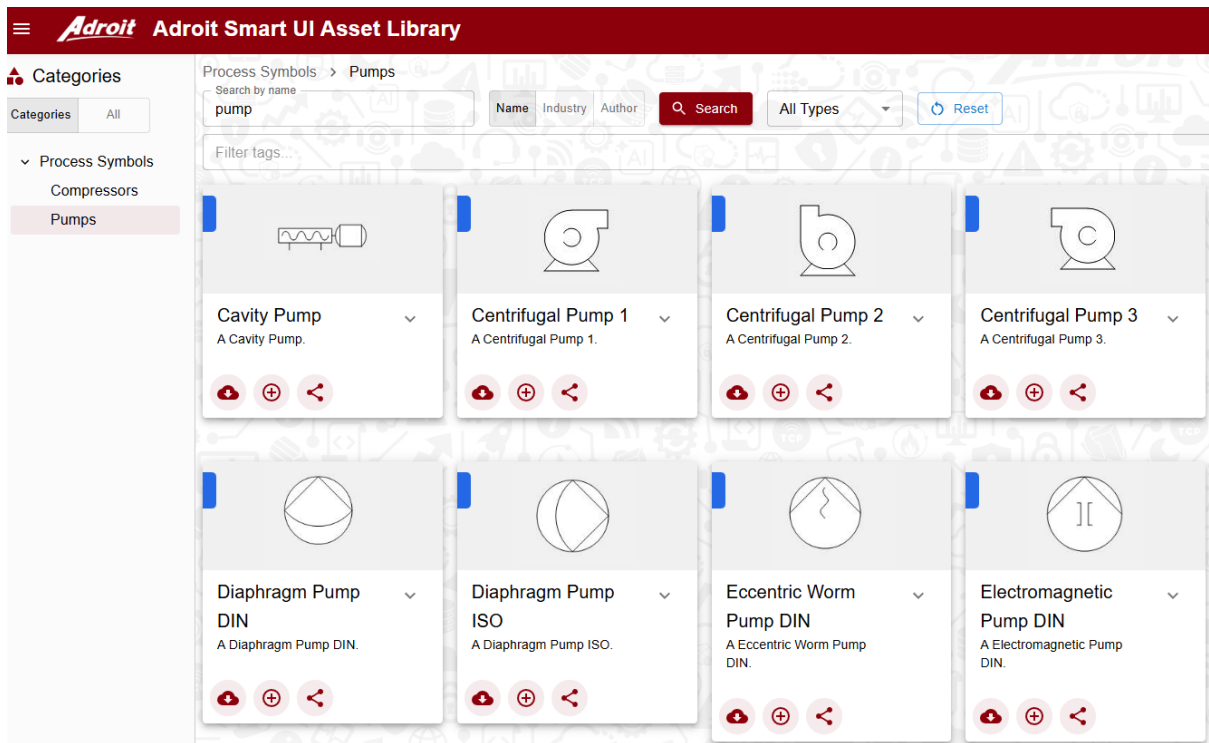

Figure 2: Searching assets by name containing "pump"

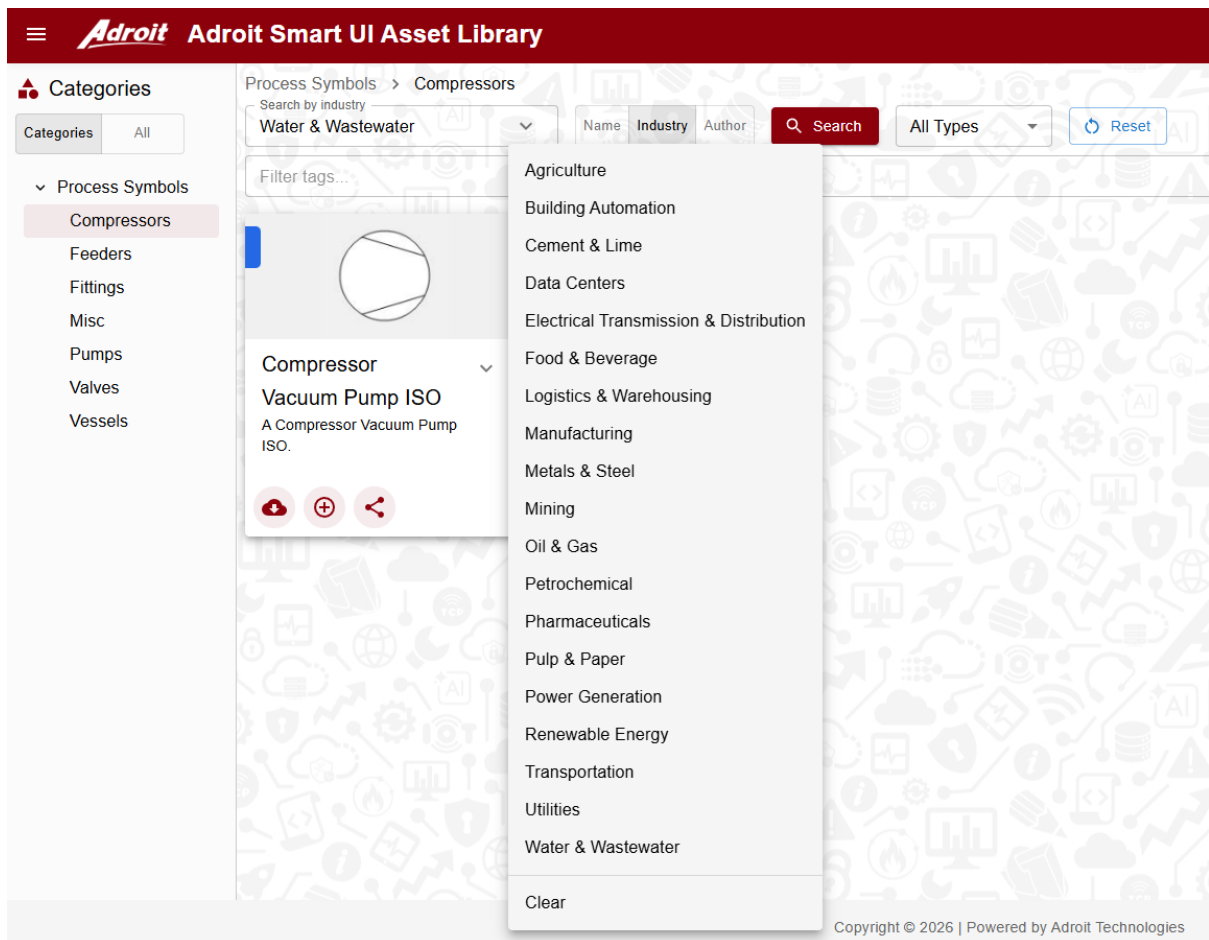

Figure 3: Searching assets by industry i.e. Water & Wastewater

Filter by asset type

Use the All Types dropdown to limit results to:

Type	Color indicator (left edge of card)
Graphic	Blue
Wizard	Red
Object	Green
Template	Purple
Default / other	Gray

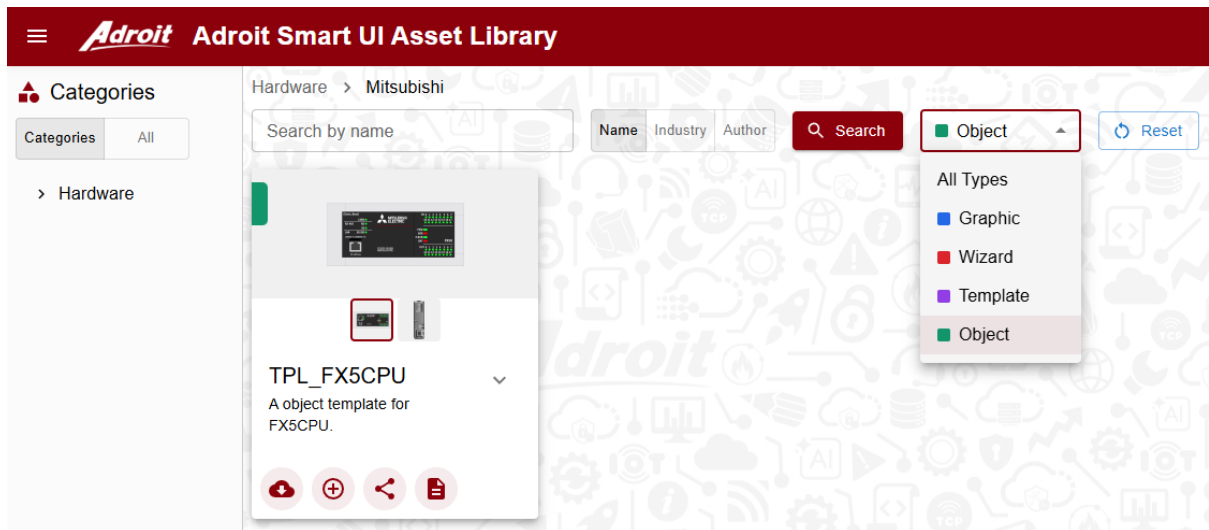

Figure 4: Filter assets by type i.e. show all Objects

Filter by tags

Below the search row, use Filter tags... to select one or more tags. Selected tags appear as chips. Remove a chip to clear that tag filter.

You can also click a tag on an expanded asset card to add or remove it from the active filters.

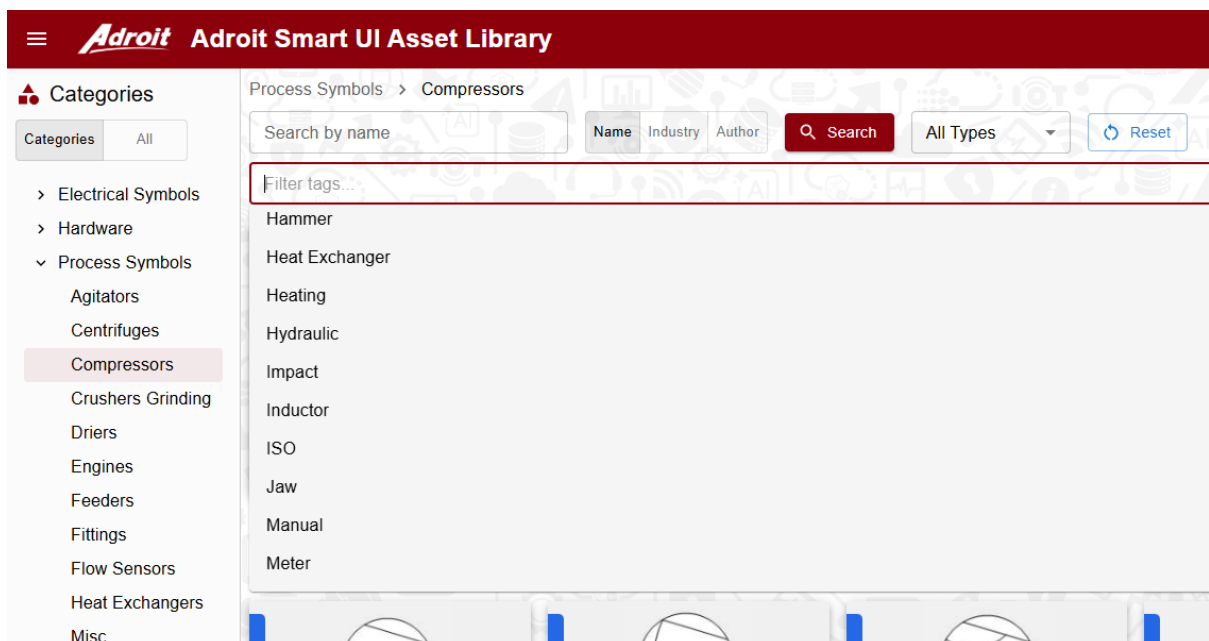

Figure 5: Filter tags dropdown options

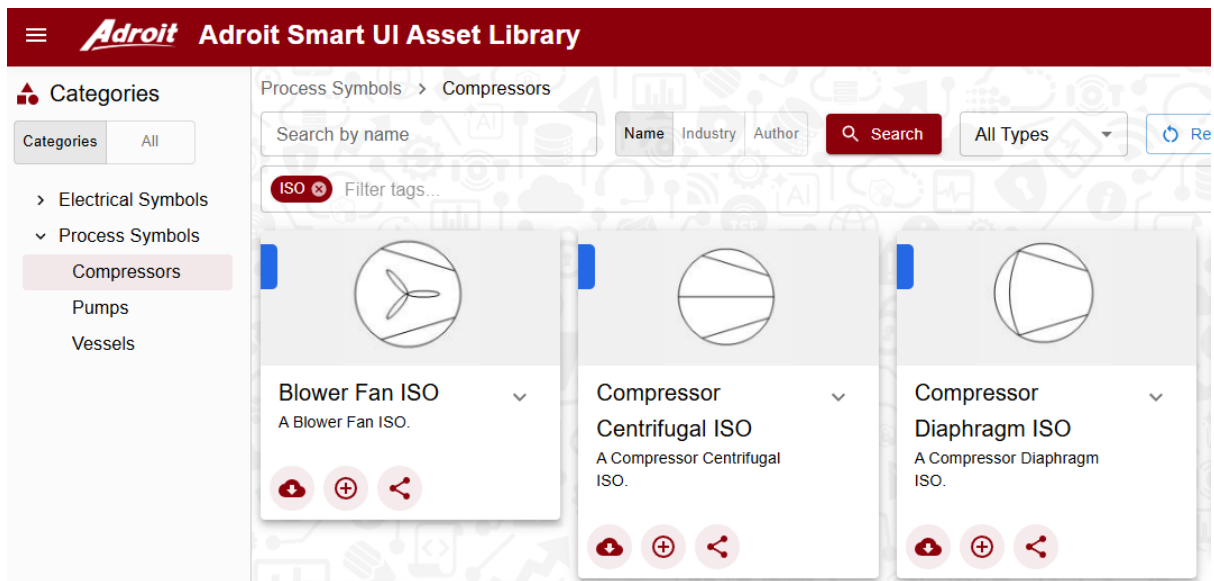

Figure 6: Filter assets by tags i.e. show all assets with ISO tag

Reset

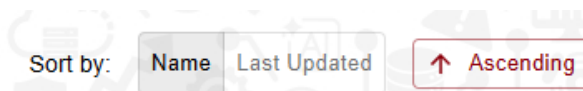

Click Reset to clear search text, tag filters, type filter, and All categories mode (returns to single-category view). Category selection is restored to the first available category after reset.

Sort results

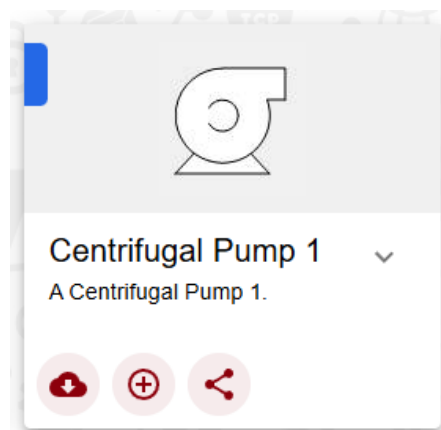

- Sort by: Name or Last Updated
- Order: Ascending or Descending (toggle with the arrow button)

Sorting applies to the assets currently visible (after category, search, tag, and type filters).

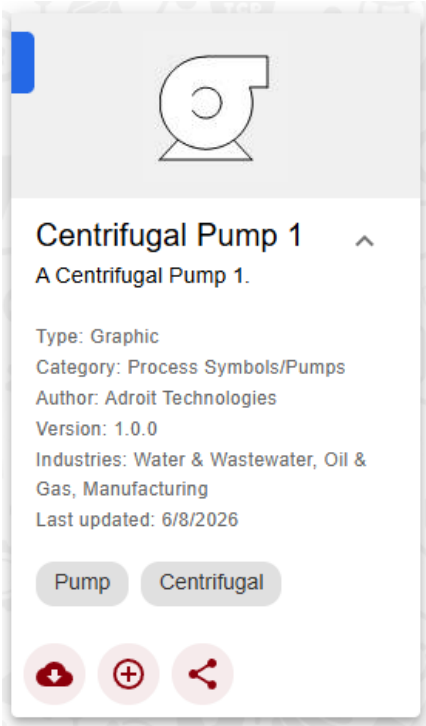

Understanding asset cards

Each card shows a preview image, name, and short description.

Expand for details

Click the card or the expand (▼) control to see file type and size, category, author, version, industries, last updated date, documentation link (if available), and tags (clickable).

Preview gallery

If an asset has multiple preview images, thumbnails appear under the main image. Click a thumbnail to switch the preview.

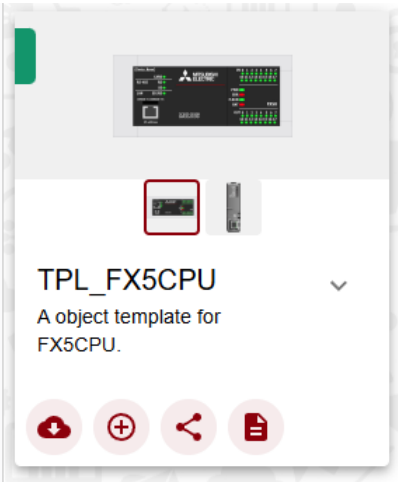

Figure 7: Object template with multiple preview images for each wizard

Card actions

Button	Action
--------	--------

Download (cloud)	Download this asset as a ZIP file named {AssetName}.zip
Add to cart (+)	Add to download cart (turns green when in cart)
Remove from cart (-)	Remove from cart
Share	Copy link to clipboard, or share via email
Documentation	Open asset documentation (PDF in browser; Word docs via Office Online viewer)

Notifications at the bottom of the screen confirm cart and copy actions.

Download cart

1. Click + on each asset you want.
2. The header Download Cart button shows a badge with the item count.
3. Click Download Cart to download all selected assets as adroit-assets.zip.
4. After a successful download, the cart is cleared automatically.

Clear Cart removes all items without downloading.

Your cart is saved in the browser (local storage) and persists if you close and reopen the page on the same device/browser.

When assets are downloaded in Embedded Mode from the Asset Library tab in the Adroit Smart UI Designer, they are copied to the Object Repository and become available in the Objects Toolbox.

Appearance

Click Dark / Light in the header to switch theme. This is available in the full (non-embedded) layout only.

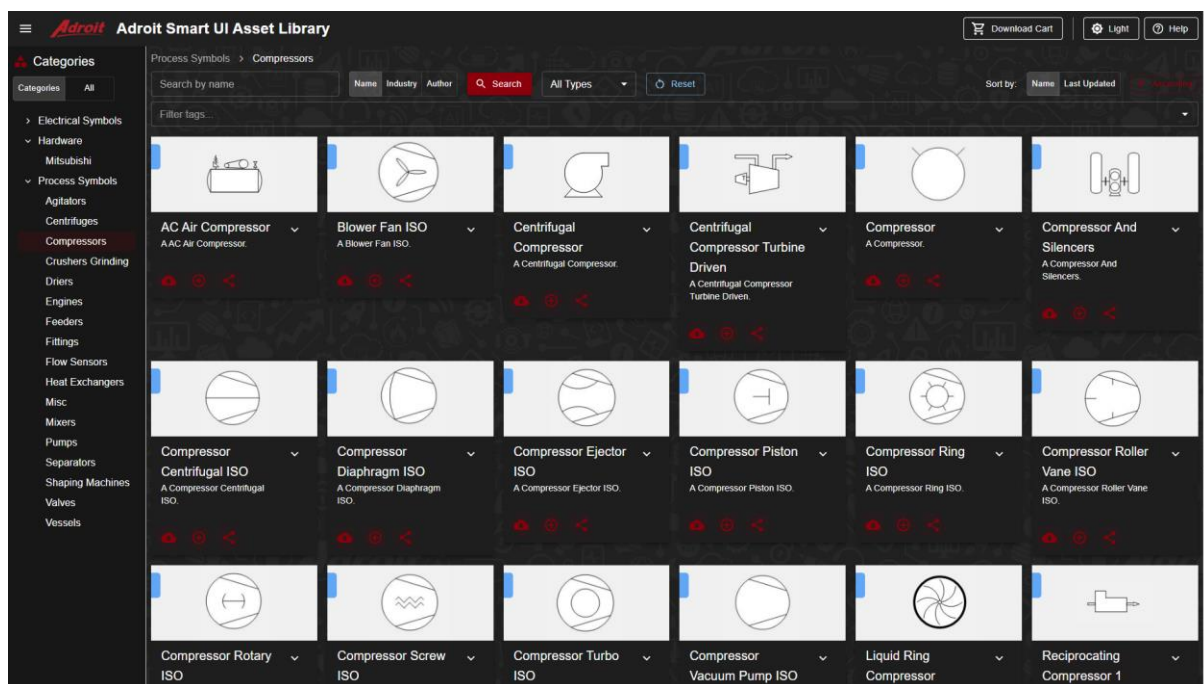

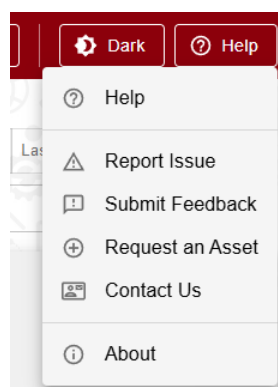

Figure 8: Adroit Smart UI Asset Library in Dark mode

Help menu

Open Help in the header for:

Option	What it does
Report Issue	Opens email to support@adroit.co.za
Submit Feedback	Opens feedback email
Request an Asset	Opens email to request a new asset
Contact Us	General contact email
About	Version and product description dialog

Common tasks (quick reference)

- Download one asset: Expand the card → click the download icon.
- Download several assets: Add each to cart → Download Cart.
- Find assets for pharmaceuticals: Set search field to Industry → pick Pharmaceuticals → Search.
- Find all wizard-type assets: Set type dropdown to Wizard (no search text needed).
- Share an asset with a colleague: Share icon → Copy Link or Share via Email.

Tips & troubleshooting

Issue	What to try
No assets shown	Click Reset; check network; contact support if the library fails to load
Search returns nothing	Confirm you clicked Search; try a broader term; clear tag/type filters
Download failed	Retry; download fewer items; check browser download permissions
Cart empty after download	Expected — cart clears after a successful bulk download
Documentation won't open	Asset may have no documentation; Word docs need internet for Office Online viewer
Embedded view missing options	Theme and full Help are hidden in embedded mode (?embedded=1)
